Diebold - Shrink Technology: A new smart concept!

Innovations for I 4.0

Diebold World Novelty

Diebold OneTouch is the most innovative shrink device on the market.

We are pleased to offer you our new shrink technology innovation and our smart concept.

For our shrink devices of the US1100 series, completely new user interfaces have been developed as touch displays. Digitization of tool management is the major progress topic.

Evolution in shrinking technology - shrinking process on a new level

Digitization for more process security and simple operation like a smartphone through touch displays.

Unique Features - OneTouch

- The only temperature-controlled shrink device on the market on a new level
- Process-safe, temperature-controlled shrinking process
- Automatic shrinking with just one push of a button, no settings required (OneTouch)
- SteadyFunction: Longer bore opening times for tool presetting by maintaining the target temperature
- Post-heating after the shrinking process is possible (overheating impossible)
- Hands-free operation with foot or hand buttons
- I 4.0 ready thanks to a new, powerful single-board computer
- User-friendly touch operation with the latest, powerful technology
- Updates via internet or USB stick
- Modern design with extensive customization options and various themes (hide parameters, deactivate buttons, dark theme surfaces, password for settings)

We offer the top innovations for I 4.0
